

**INNOSSLATE**®

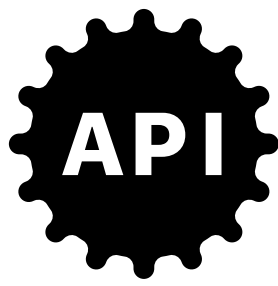

DEVELOPED BY **SPEC INNOVATIONS**

# #1 CLOUD NATIVE, MBSE TOOL INTEGRATED SOLUTION FOR ISSUE TRACKING

## BUILT-IN GITHUB INTEGRATION

View GitHub directly in Innoslate and experience round-trip integration. You'll have one centralized view for active pull requests, active issues, recent open issues, commit reports, and more. Plus individual reviews for Kanban Boards, Issues, Commits, and more.

## JAVA REST API INTEGRATION

Talk to an expert about utilizing the Innoslate REST APIs to create your own integration with issue-tracking software. We can walk you through doing it yourself or we can do it for you.

**TRANSPARENT**  
View the entire system or product life cycle for a transparent single source of truth.

**CENTRALIZED VIEWS**  
View all issues in one central view in Innoslate that the whole team can use.

**TASKING**  
Use Workflows, Kanban Boards, Gantt Charts, and more to help with tasking.

**DOCUMENTS**  
Trace issues to requirements, tasks, or test cases, & compile into a digitized document view.

**COLLABORATION**  
Being cloud-native makes real-time collaboration and workflows easy.

**CUSTOMIZATION**  
Innoslate's schema makes it easy to customize everything to meet your needs.

**REPORTING**  
Auto-generate reports into MS Office, MS Word, and MS PowerPoint.

**GAP ANALYSIS**  
Utilize AI to find gaps where issues should be traced to a requirement.

## YOUR FULL LIFECYCLE SOLUTION

awaits you with  **INNOSSLATE**®
